

Duro Screen

Duro Screen is a commercial-grade composite screening solution from Urbanline. Made from a mixture of virgin and recycled polyethylene and recycled timber fibres, Duro Screen is extra tough and impact resistant – designed to handle even the harshest conditions.

The Duro Screen range comprises several no-maintenance screening profiles, available in three different widths [42mm, 65mm and 86mm], all 24mm thick x 5.8m long. All profiles feature an attractive and realistic textured face and are available in four fantastic colours: Ash Grey, Walnut, Cedar and Redwood. Duro Screen is also dual sided, for a great view no matter where you look.

Duro Screen is incredibly strong – the ultimate hardwood timber alternative. It can even be cut with a drop-saw and planed, just like real timber. It won't split, splinter, cup, warp or rot like natural timber and, best of all, it doesn't require any maintenance, meaning there's no finishing, re-oiling or re-painting required. Install Duro Screen horizontally or vertically, depending on your aesthetic preference.

Duro Screen is the perfect solution to create a private retreat anywhere outdoors. It's ideal for fencing features, screening on balconies, parks and public buildings, private courtyards, cosy outdoor living areas, stunning garden features and adding visual impact to otherwise-bland concrete walls. So many looks can be created with this sleek, contemporary-styled screening product.

Features and benefits

There are so many great reasons to choose Duro Screen

Superior durability and hardness

Extra-tough composite designed to handle even the harshest conditions.

Versatility

Can be applied to even the most exposed areas.

Exceptional stability

Won't split, splinter, cup, warp or rot like natural timber.

Easy installation

Clean straight lines and adjustable spacing. Can be installed either horizontally or vertically.

Non Leaching

Leaching occurs when tannins are washed out of the timber, causing staining. Duro Screen is non leaching.

Ideal timber substitute

Looks like real wood, but without any time-consuming maintenance.

Rot and pest resistant

Guaranteed not to rot, split, warp or check. Highly resistant to damage caused by termites and fungal decay.

Thinking green

Duro Screen is formulated with a mixture of virgin and recycled high-density polyethylene and wood dust, which promotes product longevity and environmental friendliness.

Building better choice
