

HEATSTRIP®

CLASSIC

RADIANT OUTDOOR HEATERS

QUICK REFERENCE GUIDE

Heatstrip Classic is a range of high intensity electric radiant heaters for undercover outdoor and indoor heating applications.

Features:

- Comfortable radiant warmth from above
- Efficient, cost effective heating
- Subtle, unobtrusive, minimalist design
- Maintenance free
- Flexible mounting options
- Suitable for commercial or residential applications
- Stylish design— *The Heater that is a Design Feature!*
- Australian designed, engineered and assembled

Technical Specifications

MODEL	POWER (WATTS)	CURRENT (AMPS)	DIMENSIONS (mm)	WEIGHT (Kg)	LEAD LENGTH (mm)	PLUG
THH1500A	1500	6.3	924 x 165 x 48	5	1000	YES
THH1800A	1800	7.5	1104x 165 x 48	6	1000	YES
THH2400A	2400	10	1364 x 165 x 48	7	1000	YES
THH3200A	3200	13.3	1774 x 165 x 48	9	500	NO

MODEL	
HEATER TYPE	High intensity electric radiant overhead heater with high surface area profiled alloy
POWER	230-240 Volts Nominal at 50—60 Hertz, Single Phase
CONNECTION	3 Core Cable 1.5mm ²
APPROVALS	AUSTRALIA/NZ
MOUNTING HEIGHT	MINIMUM 2.1 m RECOMMENDED 2.3 m to 2.7 m MAXIMUM 3.0 m (For higher ceiling heights, units can be lowered using optional bracket kits or refer to the Heatstrip Max range)
MOUNTING OPTIONS	Suitable for ceiling, wall, beam, fixed umbrella and recess mounting. Also available for extension mount using rigid fixing poles and chain mount bracket.
PROTECTION RATING	IP55 Protection from water ingress from all directions
COUNTRY OF MANUFACTURE	Australia

Operating cost comparison — Heatstrip vs bottled gas heaters

In many instances, patio heaters powered by gas bottles are used as an outdoor heating source. The below table shows the operational cost comparison between HEATSTRIP® and a bottled gas outdoor heater. The hourly running costs are considerably less and with HEATSTRIP® you never have to worry about running out of gas; no refilling; no unattractive gas bottle to waste space and HEATSTRIP® actually improves the value of your property.

Electricity rate of 19.98 cents/kWh is based on December 2010 Electricity Industry Act 2000 published by the Victorian Government. Calculations of hourly running cost for outdoor gas heater is based on \$33.00 average to fill a 9kg gas bottle and average running time of 9 hours. $\$34.95 / 9 \text{ hours} = \3.883 per hour

RUNNING COST	OUTDOOR GAS HEATER	HEATSTRIP® ELECTRIC RADIANT HEATER			
		THH1500A	THH1800A	THH2400A	THH3200A
PER HOUR*	\$3.88/hr	\$0.299/hr	\$0.359/hr	\$0.479/hr	\$0.639/hr
PER YEAR**	\$699.00	\$53.95	\$64.74	\$86.31	\$115.09

Mounting Options

Heatstrip heaters can be mounted in a variety of ways. Below is an example of the options available

Basic Selection Guidelines

The diagrams to the left provide an approximate selection guide for the number and model of heaters required to heat common residential outdoor table settings.

The diagrams below provide an approximate heating area per model.

This is a guide only, and based on an undercover, enclosed outdoor area with the heaters mounted at 2.5m.
