

Universal Appeal

Efficient Open Gas Fires

Brilliant Heat. Beautiful to Watch.

Bring your existing fireplace to life and enjoy exceptional clean heat.

Universal 850 with Iron bark logs, Nova Black front.

Converting your existing inefficient fireplace to a Jetmaster gas fireplace dramatically increases efficiency and transforms your smoky hole in the wall to a beautiful centerpiece. As no flue is required (a Jetmaster will operate beautifully off the existing chimney), the installation is easy and cost effective.

Jetmaster also offers a range of décor options – everything you need to renew your old fireplace and make it work much better than before.

1. Measure the height, depth and width of your fireplace recess.

2. Choose the appropriate firebox from a range of sizes.

Universal 700D with Victorian Nickel fascia, Brompton Limestone mantelpiece, Superheat coals with full Spanish Nickel front.

3. Installation complete with Universal 600, plain arch fascia standard coals and Mahogany Richmond mantelpiece.

Universal 700D Topaz Iron bark logs.

Universal 700 See-through, pebbles.

Your fireplace
is the centrepiece
of the room –
make it work...
make it a Jetmaster.

Simply the best...open gas fire around.

Universal 1050low low with Topaz pebbles.

Jetmaster has been warming homes around the world since 1950.

Very little of the original design has changed in that time – why change something which works so well has been the philosophy of Jetmaster.

The original Jetmaster Universal wood fire with its no smoke into the room design and two-way convection and radiant heating system converted so well to burning gas and what worked so well for wood works so well for gas.

What we have changed though, is the efficiency and realism of Jetmaster's unique array of gas fires designed for the 12 Universal firebox sizes, including the stunning iron bark gas burner range with glowing embers and the Topaz range with its wrap-around stainless steel apron in pebbles, logs or coal.

Universal 700Sh Freestander (Pewter) with Topaz pebbles.

Universal Appeal – choose from a range of stylish trim options.

LANDSCAPE TRIMS

Black

Universal 700D with Cranbourne mantelpiece with 4-sided Shire Newton fascia, Iron bark logs and Sabre Nickel front.

Universal 700D with plain arch fascia, Brompton Limestone mantelpiece, Iron bark logs with Sabre black front.

Gas burners with more flame, more glow and more heat – at the flick of a wall switch.

With Jetmaster's high variable flame gas input not only do they offer stunning realism but you also get stunning heat as well – as much as up to an estimated 7-8kw* of heat output and because the flame is variable, you have total control of your gas usage.

All Jetmaster gas burners are Australian Gas Association approved which is your absolute guarantee of safety.

*Based on Superheat burner – 72mj input at 40% efficiency.

850 pebbles Topaz stainless steel front.
Suits all 850 series models.
Gas input high 65mj/hr, low 45mj/hr.

Iron bark 700 flat Nova stainless steel front.

GAS APPROVED

Jetmaster gas burners are AGA approved as type I appliances.

WOOD APPROVED

Jetmaster Fires have qualified for the National Certificate of Exemption for Solid Fuel Heaters. This certificate is issued under Section 14 of the relevant legislation in that the maximum Carbon Dioxide output from the combustion chamber is less than 5% of the volume of the appliance.

THE JETMASTER GUARANTEE

Provided the Jetmaster Fireplace is installed according to Jetmaster instruction and a Jetmaster receptacle is used for fuel burning, the unit* is unconditionally guaranteed for a period of 15 (fifteen) years (excluding rust) from the date of installation of the fireplace.

*Not including the log pan, glass doors or gas burner.
