

SUBWAY

My bathroom. My life.

SUBWAY

Design for living.

Subway is the perfect choice for your bathroom. Minimalist in design, yet offering a timeless look with its' softened straight-lines, the Subway collection of bathroom ceramics will fulfill all the creative and functional requirements expected of a modern bathroom.

Subway toilets are available with Villeroy & Boch's optional easy clean **ceramicplus** finish. This unique dirt-repellant surface prevents soils attaching and makes cleaning quick and easy, reduces the need for harsh cleaning agents and minimises water use. The toilets all feature smooth-sided pans with concealed fastenings, leaving nowhere for dirt to collect. For extra convenience, a soft closing toilet seat is also available. This enables the seat to be closed with a light touch of a finger.

The Subway back-to-wall toilet features a high quality German flushing mechanism and quiet fill valve. The concealed rear water entry point means all plumbing connections are concealed from sight, giving your bathroom a clean, uncluttered look. The suite is easy to install and offers installation flexibility, as the waste bend is able to be modified to suit a variety of s-trap installations making it ideal for renovation work.

The clean straight-lined form of Subway basins offers a balance of form and function, giving you the functionality of a tap shelf, spacious bowl, gentle lines and wide surrounding rim. With a choice of installation options including; wall-mounted, semi-recessed, vanity style or corner-mount, there is a Subway basin to suit every modern bathroom design. This collection will allow you to individualise your bathroom by offering the flexibility of one or three tapholes to suit your choice of tapware. Some models are also available with optional integrated liquid soap dispenser. The fully glazed underside of the wall basins makes them not only hygienic and easy to clean, but also allows them to be easily coupled with bathroom furniture.

The highly practical Subway single vanity basins are available in three lengths and feature extra broad rims to give you enough space for all those essential bathroom items and replacing the need for a separate, and often expensive, benchtop. Ideal for couples, the larger vanity is available in a double bowl and now also a washplane style vanity basin with two individual taps. There are also a range of bathroom cabinets available to suit the Subway vanity basins - view the Argent Centra furniture collection at www.argentaust.com.au.

From powder-rooms to ensuites, the Subway collection has the ideal solution for your bathroom.

SUBWAY

Features & Benefits

ceramicplus is the first ceramic material with a unique dirt-repellent surface. Small pores occur on the surface of conventional ceramics, allowing dirt to establish a hold. **ceramicplus** has a low surface energy, which means the mutual attraction between dirt molecules and water is greater than the attraction to the **ceramicplus**. Consequently, the water forms small droplets which literally roll down the drain.

The advanced technology of the soft closing seat and hinge combination enables the seat to be closed with one simple touch. Constant battles about the toilet seat being left up is a thing of the past. The new soft close seat will lightly touch down, everytime, with just a slight push of the seat.

Concealed fastenings: the unique fixing system ensures the wall hung toilets and bidets are installed quickly and securely, and means no unsightly bolts are left visible, creating a smooth-sided and easy-to-clean surface.

Fully glazed underside: perfect in appearance and hygienic in use, all Subway wash basins include a fully glazed underside. The shape and surface of the lower rim also enables problem-free retrofitting onto bathroom cabinets.

All Villeroy & Boch ceramics are covered by a 5 year warranty (Conditions Apply)
