

Digipass Keypad

Vandal proof keypad

Each keypad is machined from a solid block of a new high strength aluminium compound. This ensures that even the most extreme abuse will not stop the keypad working correctly.

The electronics are then sealed in epoxy, making it completely water and dustproof.

There are two N/O relays which can be momentary or latched both time adjustable. There is also an input for a push button in parallel to relay A.

If the master code is lost you cannot enter the set up program but by shorting two concealed pins on the rear of the keypad you will revert to the factory code.

The Digipass is capable of storing 120 codes from 1 to 8 digits and individual codes can be erased and added via the keypad.

Technical Specifications	
IP Rating	IP 67
Voltage	12-24v ac/dc
Size	142 x 42 x 23
Power	6mA
Relays (x2)	Rating 10 A 28v resistive

Rotech supply all forms of door and gate automation

Vehicle Access Control

- Booms Gates
- Sliding Gates
- Swing Gates
- Industrial Door Openers
- Solar Powered Gate Openers

Pedestrian Access Control

- Full Height Turnstiles
- Waist Height Turnstiles
- Supermarket Gates/Turnstiles
- Wheelchair Access Gates
- Rapid Access Gates

Fast | Safe | Secure
