CONVECTIVE PANEL HEATERS

The THERMOFILM convective panel heater control features a simple ON/OFF timer switch, 24 hour manually set timer dial and adjustable temperature control for simple functionality and cost effective

Natural, easy and cost effective operation

THERMOFILM CP series heater

The CP series convective panel heater by THERMOFILM AUSTRALIA has been designed for easy, cost effective operation. Supplied with wall mounting brackets and a castor wheel set for optional portability, the THERMOFILM convective panel heater features a simple ON/OFF function, adjustable thermostat control and Australian designed 24 hour manually set timer.

Natural, convective heating

The combination of natural convective currents and radiant heat quickly warms you and the space around you. These natural convective currents allow minimal circulation of dust, pollens and germs making the THERMOFILM convective panel heater the ideal choice for asthma, allergy and hay fever sufferers.

Simple functionality

The THERMOFILM convective panel heater features a simple ON/OFF switch and an adjustable temperature control ensuring ease of functionality. Thermostatic range extends from 5°C (frost protection function) to 30°C.

Cost effective operation

Save money and energy with the Australian designed 24 hour manually set timer dial, which can reduce your operating costs by ensuring your THERMOFILM convective panel heater is ON when you need it and OFF when you don't. This timer allows you to select specific daily ON and OFF operating times with 20 minutes increments.

Assured peace of mind

The THERMOFILM CP series convective panel heater complies with both Australian and New Zealand electrical standards. These heaters feature an inbuilt auto reset thermal cut-out and electrically protected heating element. With solid metal casing and no moving parts, you will enjoy trouble free operation guaranteed by a 2-year product replacement warranty.

THERMOFILM AUSTRALIA

THERMOFILM AUSTRALIA is an Australian owned company specialising in innovative and energy efficient heating products. Please visit www.thermofilm.com.au for more information.
