

Timber Flooring

Having specialised in the manufacture and sales of recycled and new timber flooring for more than 27 years, Nullarbor Sustainable Timber appreciates and understands that choosing timber flooring for your home or office is a major decision.

With experience and dedication to produce a premium quality product, we will assist you in every step of the way, taking into consideration your lifestyle and the feel and fit of your home or office.

We encourage you to be a part of the project from start to finish by visiting our purpose built factory in Echuca/Moama where our entire flooring range is produced to the highest professional standards. We have every confidence in the performance of our flooring because we take pride and care as if we are preparing it for ourselves.

Our flooring is processed with a secret nail T & G (Tongue & Groove) profile and then end matched to Australian standards for Victorian conditions.

Every parcel produced passes through a series of quality control checks to ensure all timber dispatched meet the required grades for grain quality, profile accuracy and moisture content.

Timber Flooring Range – Widths up to 240mm.

Species available include

- Iron Bark
- Spotted Gum
- Blackbutt
