Corinthian Door Collection

New Products

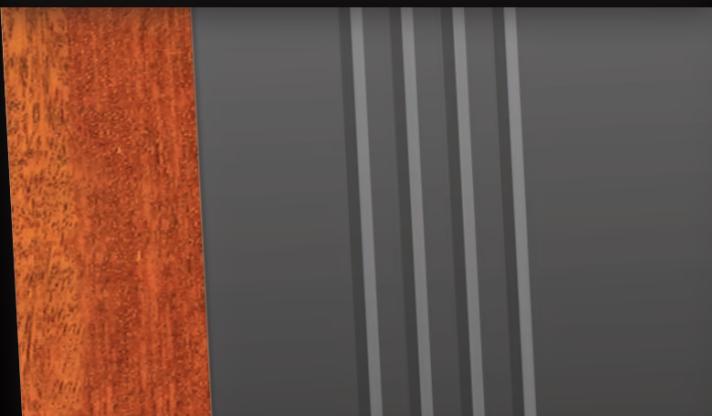

Corinthian has earned its reputation as Australia's best manufacturer of doors, a reputation that has been built over 70 years through the unrelenting pursuit of quality, and a passion for craftsmanship. This tradition of being at the forefront continues, as we bring inspiration from local and European trends, architecture, and building technologies to our latest range of internal and entry doors.

The new light coloured timber veneer gives you the ultimate in flexibility as you can stain it to almost any colour or tone that suits your décor. The horizontal grain pattern provides a distinctive and European influenced design. See doors featuring this finish on pages 20, 22 and 44.

A real innovation in internal doors, laying a strip of luxurious walnut veneer integrated into a pre-primed door face. Paint the door to complement the interior design or to make a feature of the beautiful timber veneer. See this unique door range on page 36.

Glass is the material of choice in leading edge design today. Featuring a semi-frameless design and optional v-groove patterns on the glass, this new and unique range of doors will complement modern architecture. See this innovative door range on page 32.

The innovative combination of horizontal grained veneers with contrasting veneer strips is a unique finish on this door range. Providing a flush surface that can easily be stained, these doors will suit a wide range of interior design themes. See this innovative door range on page 40.

More than just a door...

Rich grain veneers, intricate detailed inlays, and masterful joinery all take their part in this collection. Doors which are unique and distinctive, and artworks in their own right can blend seamlessly into the background, or become an inspiring centerpiece or focal point to your room.

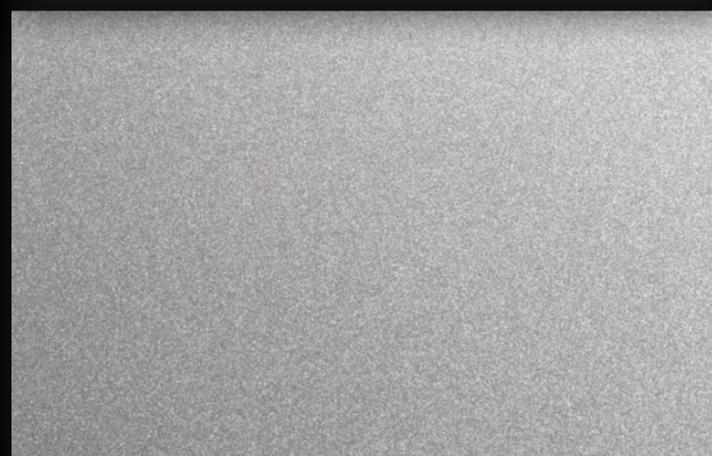

The new use of metal inlays on a range of rich grain veneers makes these doors very special. The metal and grain complement each other in these designs and will turn the door into the focus of your home. See doors featuring this finish on pages 6, 10, 16 and 18.

A pre-finished door with a contemporary design and the ultimate in durability would be a very special door. This is that door. Featuring the innovative use of a high pressure laminate to provide durability and a brushed aluminium finish that makes this truly distinctive. See this new and innovative door range on page 26.

A wood grain door that doesn't need to be stained, yet has a high gloss and tough finish. The unique high pressure laminate provides a beautiful door that will make any room sparkle. See this new and innovative door range on page 26.

Pearlescent finishes are commonplace on cars, but have never been seen on doors. The innovative high pressure laminate brings this finishing option to your design palette. See this new and innovative door range on page 26.

Contemporary Internal Doors

Corinthian takes internal doors from just being a functional necessity, to a design and style statement that will attract admiration. Taking cues from European designers, the latest advances in manufacture and trends in Australian interior design, Corinthian has honed its contemporary internal door collection to a range that is beautiful and unique, while meeting the exacting standards of the Australian homeowner.

NEW

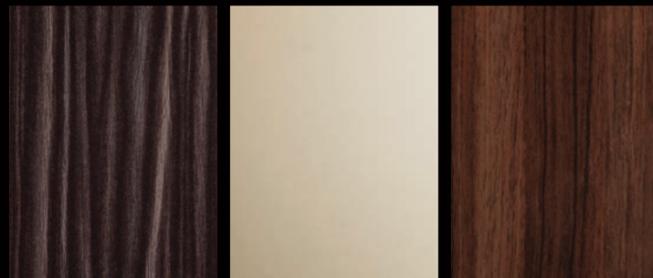

Aurora

The Aurora internal door range is daring and bold. The innovative use of high pressure laminates opens your world to colours and textures never seen on doors before. Aurora's high pressure laminate door face requires no painting, staining or finishing, and is tough and durable.

You can almost feel the grain in our stunning collection of timber-look finishes that combine the beauty of timbers from around the globe with high technology, hard wearing laminated panels. Or, for a more subtle feeling, select a soft, gentle matt finish that tones things down and gives the built space a more classic feeling.

If you want your door to shine, choose from our rich, reflective gloss collection that includes a palette of solid colours as well as a collection of pearlescent finishes. For finishes that reflect contemporary kitchen appliances, our range of brushed and reflective metals make Aurora doors right at home.

We have selected a range of 6 finishes shown below that will complement many of today's design trends, but with over 50 finishes to choose from you will be inspired to create your own piece of ultra-chic interior design.

Cavity Slider Solutions

Corinthian's Slimline range is the ultimate space saver allowing you to utilise the floor and wall area that traditional doors cover. Incorporating leading edge technology in the track and roller system, now you don't have to compromise design aesthetics. Corinthian offers a range of cavity door solutions for standard sized doors (Slimline 3000), floor to ceiling height doors (Slimline 9000), heavy timber and custom doors (Slimline 6000).

Features

- Can accommodate doors up to 125kg in weight.
- Can accommodate doors in standard heights of 2040mm and 2340mm as well as custom door heights and a wide range of widths.
- Easy removal of doors for painting or staining.
- Available in single or double openings.
- The roller mechanism is smooth and rattle free when in use and operates on a jump-proof twin roller track.

Note: Slimline 3000 maximum door weight 65kg, standard door heights 2040mm and 2340mm only.

General Information

- Corinthian door care and finishing information, installation instructions, trimming allowances and construction details can be found at corinthian.com.au or contact your local Corinthian office for further information.
- This brochure features an extensive range of Corinthian products that are generally available at the time of printing. However in the interest of quality and performance, availability of doors and designs may vary.
- Photographs or illustrations may not exactly depict the design, colour or specification accurately and Corinthian recommends visiting a showroom.
- Door designs and their availability, glass options and other door hardware may vary from state to state. Contact your local Corinthian office for further information.
- Due to the manufacturing process Corinthian cannot guarantee that horizontal rout lines will align on sets of double doors that have this feature.
