

# Case Study

# INEX>RENDERBOARD™ with a Rockcote finish

**PROJECT:** Etsu Japanese Restaurant, Mermaid Beach, QLD

**WHAT:** Long bar and reception counter

**WHEN:** August 2014

**PRODUCT:** Rockcote Marrakesh trowel applied (2-3mm) over the **INEX>RENDERBOARD**

**BUILDER:** Chris Humpries

**ARTISAN  
PLASTERER:** Michael Symington

The owner of this newly opened Japanese restaurant wanted the bar to be the most dominant feature taking up half the width of the space. The long bar is the main feature of the restaurant which is already accentuated with stunning sensory decorative effects that seduce both the eye and the brain.

The quirky, bold and brilliant use of the **INEX>RENDERBOARD™** is loved by the owners and clientele alike. The use of UBIQ's product in Mermaid Beach is versatile yet industrial while being hard wearing and cost effective.

The long bar and the reception counter is constructed with **INEX>RENDERBOARD™ 16** over a timber frame and delivers that solid concrete feel to the structure.

Rockcote Marrakesh has been trowel applied (2-3mm) over the **INEX>RENDERBOARD™** to achieve that authentic natural polished patina of Moroccan plaster
