RETROFIT
SOLUTION
AVAILABLE

PRECISION
&
PERFORMANCE

SYLVANIA

THE BENCHMARK IN LED SPORTS & AREA FLOODLIGHTING

Discover the new Sylvania Briteline™ Raptor LED Floodlight designed to deliver unbeatable precision, power and flexibility in many sports lighting applications.

BUILT TOUGH TO SURVIVE

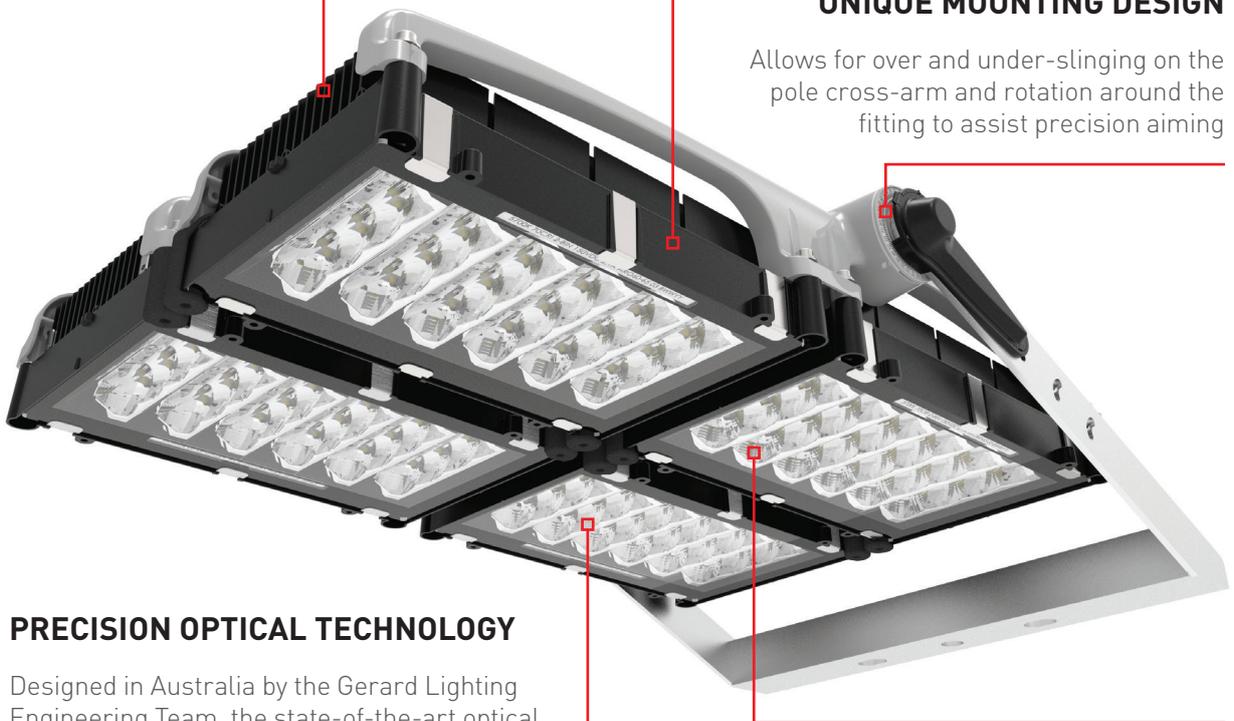

Diecast LM6 aluminium frame with 316 stainless steel fixings, and stainless steel conduit to protect exposed wiring from birds and nature's elements. IP66 and IK06 Protection

SLEEKER BUT STRONGER

Raptor's lean size and weight makes it perfect for retrofits. Lower windage (0.17 m² at 13° tilt) and greater stability minimises pole loading and infrastructure costs

UNIQUE MOUNTING DESIGN

Allows for over and under-sliding on the pole cross-arm and rotation around the fitting to assist precision aiming

PRECISION OPTICAL TECHNOLOGY

Designed in Australia by the Gerard Lighting Engineering Team, the state-of-the-art optical reflector system intensifies performance while minimising light loss, glare and spill light. Options for A1 Extra Narrow, A2 Narrow and A3 Medium Asymmetric Optics

HIGH ENERGY EFFICIENCY

High lumen output with minimal power use for energy cost savings and improved sustainability. LER →100 lm/W

FUTURE READY

Raptor is designed and ready to accept Diginet RAPIX Lighting Control System with the new sports lighting software interface.

WHAT MAKES THE RAPTOR DIFFERENT?

EFFICIENCY IN ITS DNA

The key to Raptor's performance is its world-first, Australian-designed reflector system housing the latest LED chips. This state-of-the-art technology intensifies performance and minimises losses to make Raptor one of the most energy efficient high powered LED floodlights on the market. The Sylvania Briteline™ LED Raptor produces a high lumen output with less power, providing up to 40% in energy savings compared to traditional HID floodlights

RAZOR-SHARP PRECISION

Cutting-edge and unique, Raptor's optical reflector system delivers dedicated asymmetric distribution with exceptional performance and precision. This new optical technology distributes light exactly where it's needed, providing better control, lower glare and less spill light to increase efficiency and reduce the impact on neighbouring residents

MAINTAIN EXISTING INFRASTRUCTURE

Raptor's distinctive luminaire design minimises weight and reduces the loading details for the pole design. As a result, new installations can be planned at optimal cost and can be used as retrofits for most existing infrastructure. The NEW Extreme LED Hybrid control gear also enables the installer to utilise existing cabling infrastructure when upgrading from HID floodlights to LED technology

EASE OF INSTALLATION

A flexible trunnion mounting system allows for over and under slinging on the pole cross arm. This unique design allows the installer to correctly aim the floodlight to avoid obstructions and maximise light delivery

MAINTENANCE FREE*

Built tough for Australian conditions, Raptor offers increased design life with lower ongoing maintenance costs compared to HID and other LED floodlights. It uses the latest LEDs with very low rates of lumen depreciation, and robust remote driver assemblies

*No lamp change, no planned maintenance except for standard maintenance checks for safety at site and cleaning cycles.

LIGHTING CONTROL READY

The ability to control sports lighting applications with dimming, switching and scene control for different sport field users is increasingly requested. This is being driven by the use of LED in Sports lighting such as the Raptor and Councils desire to be able to remotely control and bill for energy used by the public.

RAPIX Lighting Control systems in conjunction with Raptor provides more control, with remote internet based control and monitoring, scheduling, user auditing and billing capabilities. Even multi-field, multisite control and monitoring is possible using the RAPIX Lighting control solution as the foundation

Designed in Australia for Australian regulations and operating conditions.

CLOUD BASED SPORTS FIELD LIGHTING CONTROL

RAPIX
CLOUD

For many sporting facilities, accountability can be an ongoing headache. Keys can get lost, passwords can be shared with the wrong people, and usage can be difficult to track, making billing and reporting problematic.

Enter RAPIX Cloud – a cloud based sports field lighting control solution that empowers sports clubs, councils and users to manage lighting both remotely and locally, providing utility, convenience and accountability all around.

RAPIX cloud makes life easier providing:

- Total control over usage and costs across multiple fields and locations
- Ability to create multi-user access levels
- Allocation of usage via one-time token authorisation/de-authorisation
- Scheduling to align with regular practice and game times
- Easy reporting on usage and billing
- Access to lighting control via a simple app and web browser interface
- Scheduling via a familiar calendar booking system

SAVE BIG

Save on energy and maintenance costs.

SAFETY FIRST

Increase safety and security for users.

OFFER MORE

Provide better services to the community and sports clubs.

TRANSPARENT

Transparency on billing for the facility and designated users.

SIMPLE CONTROL

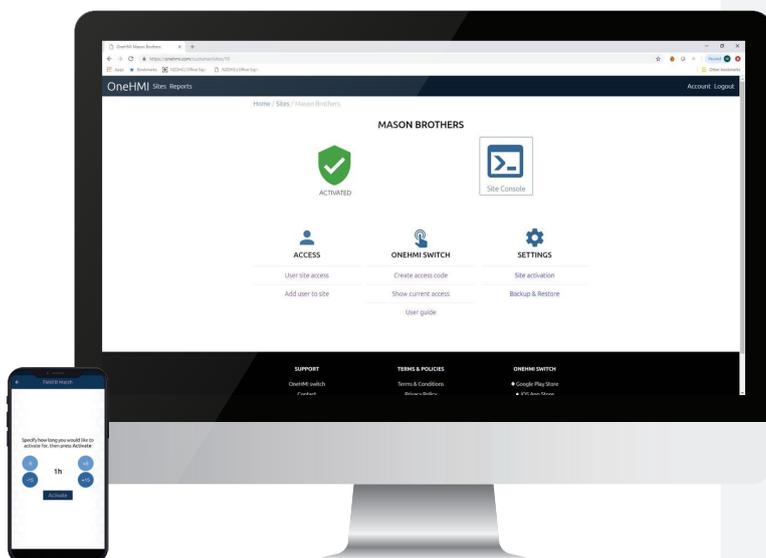

Online control of sports fields and court resources.

EASY INSTALLATION

Suitable for new and retrofit applications.

RETROFIT SOLUTION

HID FLOODLIGHTS

The perfect solution when upgrading existing HID floodlights to LED technology, a **NEW** addition to the Raptor range is the Extreme LED Hybrid control gear. Enabling the installer to utilise the existing cabling infrastructure, making it ideal for both retrofit scenarios and new installations

Existing Briteline or other similar HID floodlights and control gear models.

Proposed RETROFIT with Raptor 1200 and Extreme LED Hybrid Control Gear, using existing cabling

HYBRID CONTROL BENEFITS

- IP20 and IP65 models available in both 240V and 415V
- Optional accessory available which offers 50% dimming for training mode
- Requires a two core cable between the driver and luminaire, providing an ideal solution for HID Floodlight retrofits. Installation of earthing is required as per Australian Standards
- The Extreme LED Hybrid control gear has been designed to match the footprint of the existing HID control gear
- For new installations, the distance between the control gear and the floodlight has been greatly improved. This offers benefits for both installation and maintenance
- Proven to offer protection in extreme environments with up to 60°C ambient temperature, offering high immunity to surges and low inrush/leakage current

TECHNICAL DETAILS

FLOODLIGHT SPECIFICATIONS

- Input power – 1270W 4 module system
- Lumen Output - up to 136,000lm
- LER→100 lm/W
- 5700K Ra→70 / Ra→80,
4000K Ra→70 / Ra→80
- Rated Average Lamp Life of 50,000hrs
at L90* B10
- Ta 40°C
- IP66 and IK06
- Windage of 0.17m² (at tilt of 13°)
and a weight of 28.6kg
- Windage including Apron Hood = 0.25m²
- Die cast LM6 aluminium frame in grey
- Galvanised trunnion arm allowing for over
and under slinging on cross arms
- Lighting Control ready
- Asymmetrical distribution
- Anodised aluminium heat sink modules
- Bird spikes supplied
- 5 Year Warranty†
- Compliant to AS/NZSCISPR15, AS/NZS 60598
