

**The paint the professionals use**

For over 60 years, Resene has forged a reputation of excellence and quality in manufacturing products designed to meet the demanding standards of architects, engineers and property owners and managers. The Resene range includes paint and specialist coating products for residential and commercial buildings.

Resene is renowned for its environmental friendliness. To reinforce this position we have joined the Environmental Choice Programme. Resene's commitment to this programme and our continuous development process to reduce the risk our products may present to our customers will ensure that safer, professional quality paint is available to everyone.

**Resene PaintWise** Resene has pioneered product stewardship introducing **Be PaintWise**, facilitating the recovery of unwanted paint and paint packaging diverting tonnes of paint and packaging away from landfills.

For more information on Resene products, colours, services, Environmental Choice and Be PaintWise, visit our website [www.resene.co.nz](http://www.resene.co.nz) (NZ), [www.resene.com.au](http://www.resene.com.au) (AUST) or call us toll-free on 0800 RESENE (NZ) or 1800 738 383 (AUST).

If this business card is missing  
please call 0800 RESENE (in New Zealand)  
or 1800 738 383 (in Australia)  
for your nearest Resene representative.

**Resene is recognised as an innovator in colour and a manufacturer of quality paints, combining this expertise with a complete project development service to ensure property owners and managers achieve an outstanding finish and protection on their decorating projects.**

### Professional service and advice

Prompt and competent professional service and advice is available from trained field staff in the following areas:

- Inspection and written report on the building or structure to be painted.
- Development of a coating specification.
- Technical advice on products, systems and specific application techniques.
- Prepaint inspection of properties. Practical on-site product trials and assistance where required.
- Site inspection sheets held on file for future access.
- Tendering of contracts.
- Colour consultancy service, encompassing colour matching and the development of colour schemes.

The Resene product range includes paint and specialist coatings for residential and commercial buildings. To help building professionals keep abreast of new developments in our product range we have an innovative range of project services and reference materials, including technical and specification manuals, the Resene Total Colour System, samples and online information.

We can draw on a range of staff from technical experts through to colour consultants to provide whatever assistance you require.

While some projects require the full-service approach where the Resene representative is involved in all steps (see flowchart opposite), it is also common for building owners and managers to manage the project more closely and run their own tenders. In these situations, owners and managers are welcome to seek our advice on suitable coatings and application to assist their refurbishment programmes.

### Project services professionals enjoy

The complete Resene project development service covers all facets of the coatings process.

The level of our involvement in any specific project is up to you. If preferred, we will work alongside your chosen agent. For those specifying Resene products on commercial work, our services are free, therefore you can use us as much or as little as you like.

### Why the professionals use Resene

- Full support at all stages of the project.
- Complete range of coatings including:
  - Decorative finishes;
  - Protective coatings designed to protect substrates in aggressive environments;
  - Applied finishes, including waterproofing membranes and a range of textured coatings.
- Technical expertise.
- Innovative colour scheme development and tools - the Resene Total Colour System.
- Proven track record in project services.
- Quality products backed by ISO 9001 accreditation.
- Written warranties.

Our professional and dedicated project services team can provide you with expert advice, specifications and colour support.

We are leaders in providing professional advice, high quality products and superb colours - the three vital ingredients in any successful coating project.

Whether your requirements are large or small, you'll find that Resene have the service and products that are designed to suit the local environmental conditions and you.

Please contact your Resene representative or your Resene ColorShop for further information, call **0800 RESENE** or visit **www.resene.co.nz** (NZ); call **1800 738 383** or visit **www.resene.com.au** (AUST).

### Typical project flowchart

Resene not only provides a complete coating project service, but also the quality products and colours you need to get the best finish.

### Quality

The key to Resene's reputation is its solid commitment to excellence and quality, monitored through controlled testings in the Resene registered laboratory and in the field.

All products are backed by a technical team committed to maintaining product quality and constantly researching new or improved technologies to enhance product performance, application and safety. Resene paint is recognised as world class, evidenced by our exports of paint technology.

Our internationally recognised quality systems and ISO 9001 accreditation allow us to guarantee our products for consistency and performance, so Resene quality is assured - every step of the way.

### Colours

Sophisticated tinting technology enables Resene to produce durable colour options that remain true to colour. We utilise a variety of colour scheme aids to simplify colour selection.

Our computerised colour rendering service, Resene RenderRite, is one example where you can 'see' the finish before the painting has even started.
