## Low-Carbon Aluminium powered by Alspec

In accordance with global imperatives for sustainable development and thoughtful resource management, Alspec is pleased to formally announce a transformative leap in our product portfolio: the GreenCore® range of low-carbon aluminium. This innovation underpins our strategic commitment to environmental, social, and governance (ESG) excellence, while maintaining our premium standards of quality and performance.

### What is GreenCore®?

GreenCore® is not merely an aluminium product; it is a testament to Alspec's dedication to eco-efficient solutions. 'Green' signifies an all-encompassing embrace of environmentally conscious practices and state-of-the-art technologies. 'Core' refers to the billet, signalling that the material's reduced carbon footprint is inherent, extending throughout its entire composition.

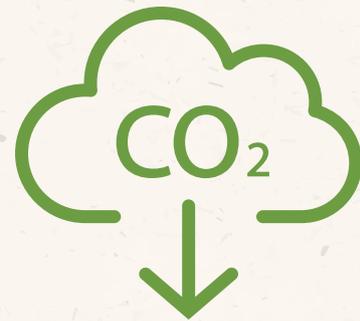

We are proud to confirm that GreenCore® specifications are available across our comprehensive range of commercial window and door systems, providing customers with sustainable options that do not compromise on technical excellence.

### GreenCore®'s Low Carbon Metrics: An Industry Benchmark

The GreenCore® range boasts a carbon intensity of just 8kg CO<sub>2</sub>e per kg of aluminium. The metric, expressed as carbon dioxide equivalent (CO<sub>2</sub>e), is a universally recognized measure for assessing the global warming potential engendered during the production process. This value sets a new industry standard, showcasing our commitment to advance the frontiers of sustainable aluminium production.

Our focus on reducing CO<sub>2</sub>e in the GreenCore® range not only advances our ESG objectives but also offers our customers a quantifiably greener choice. We invite you stakeholders to join us in pioneering a sustainable future for our industry.

## Why GreenCore® ?

Choosing responsibly sourced, lower-carbon aluminium for your next project is not only an environmentally sound decision, but also serves as a beacon of your commitment to sustainability and innovation.

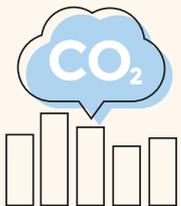

### Environmental Stewardship

Specifiers have a unique role in shaping the built environment, and by specifying low-carbon materials and practices, you actively contribute to the reduction of greenhouse gas emissions.

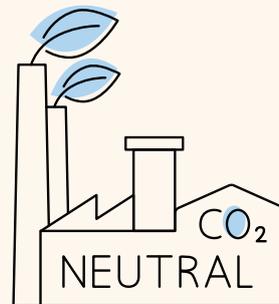

### Regulatory Compliance

Many regions are instituting stringent environmental regulations and standards.

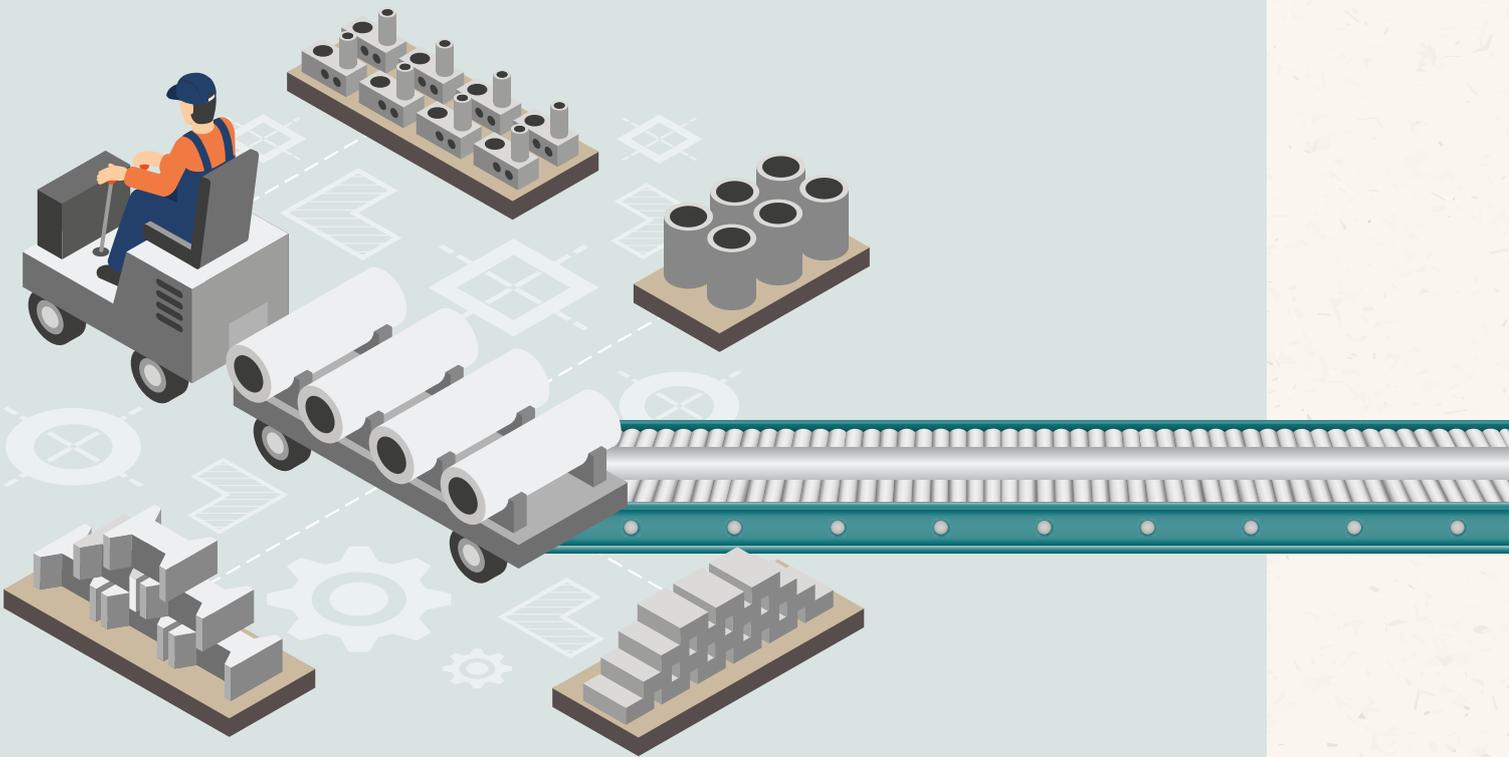

### Educational Opportunity

By specifying low-carbon aluminium, you are influencing clients, contractors, and the public by showcasing the benefits of low-carbon design.

### Mitigating Climate Impact

The construction industry is a significant contributor to carbon emissions. You can significantly lessen the carbon footprint by selecting materials with lower embodied carbon and designing energy-efficient buildings.

## GreenCore® Systems:

Our GreenCore® range extends across all commercial window and door systems, ensuring a sustainable yet high-performance solution for your architectural needs.

- Hawkesbury Top Hung Sliding Door
- Hawkesbury Multi-Fold Door
- ProGlide Sliding Door
- ProGlide UltraFlat
- Altitude Sliding Door
- Altitude Sliding Window
- Swan Evo
- Torrens Door
- Air-Flo Plus
- ProVista
- View-Max Sliding Window
- ProTilt
- Awnings
- EvoPlus Double Hung
- Derwent Framing
- McArthur Evo Framing
- ecoFRAMEplus
- Hunter Evo
- ecoWALL 225
- Hastings
- Sub-heads and Sub-sills
- 45mm Display Suite
- Opal Suites
- Diamond Suites
- ThermAFrame (all suites)
