Australia's Alternative Timber Coating Company. Established in 2004 by Giles Whittle-Herbert and Darren Bell who saw a growing need for Environmentally-friendly timber finishes.

Made in Germany, formulated for Australian timber and environment.

Whittle Waxes has a broad range and can cater for most applications. Whittle Waxes coatings are affordable, easy to apply, durable and beautiful to look at.

Advantages

- Technological advances in waxes and oils outperform other coating groups. Micro porous hard waxes let your timber breathe, are non static and simple to maintain.
- Easy application, revives wood fibers, oils penetrate to nourish wood giving it a natural and agreeable surface to touch.
- Strongly water repellent, resilient against common foodstuffs and household chemicals.
- Can be applied to all interior wood surfaces floors, stairs, kitchen worktops, tables, furniture as well as cork, linoleum, terracotta, natural stone, and porous concrete, unglazed tiles, also in damp rooms such as the bathroom and kitchen.
- Oiled floors when properly cared for never need aggressive sanding again.
- Coatings made from vegetable oils, natural waxes and isosalphates contain no biocides or preservatives are safe for the environment, humans, animals and plants after drying and complies with DIN 53160 and EN 71

Whittle Waxes Products

- Hard Wax Oil
- Object Oil
- Water Blocker
- Cleaning and Maintenance Products
- VOC Free finishes
- Wax Primer
- Pigment Paste

TRAMEX

Moisture Meters you can depend on

The **Cornell Group** offers you all the information you need on Tramex Moisture Detection Equipment. Including sales, service & calibration and technical support.

Located in Sydney, we stock the entire range so please contact us for advice on which model is most suitable to your requirements.

CMExpert II – Concrete Moisture and Humidity Meter

The New Concrete Encounter CMExpert II is a digital display version of the Tramex Concrete Encounter CME4 hand-held electronic impedance moisture meter. It operates on the principle of non-destructive impedance measurement. Parallel co-planar electrodes are mounted on the base which, during operation, transmit a low-frequency signal into the concrete floor. To carry out moisture tests simply brush any dust from a smooth area of concrete and also from electrodes, switch on the CMExpertII and press to the surface to read the percentage moisture content.

- Measures from 7% to 40% Moisture Content in Wood.

Perform testing to the latest Australian Standard AS1884-2012. ASTM F2170 & ASTM

F2659 as well as ASTM F2420: The complete moisture and humidity testing kit for concrete and wood, incorporating the Tramex instant moisture test and the new Hygro-i in situ probe working together to provide a new standard in speed and accuracy which can be used again and again.

Features

- Measures to 6.9% Moisture Content in Concrete
- Instant Readings in Non-Destructive and Wood Probe modes
- Plug in Probe for Relative Humidity, Temperature, Dew-Point and Mixing Ratio readings

CANTERBURY

FLOOR POLISHER

cleaning | scrubbing | sanding

The original Canterbury polisher built by HD Rossiter since 1938 have manufactured over 30,000 machines and still going strong. With a centrally mounted motor coupled to a helical drive gear box, this virtually maintenance free machine is smooth and well balanced without suffering torque loss due to slipping belts. All machines are hand built and individually numbered.

We also stock:

- Mapei moisture barriers, levelling agents, adhesives, and coatings
- SIA sandpaper
- Maroon I black I red pads
- Foam cut outs 16'
- Tools test and tagging
- Sanding machine dust bags
- 3 or 4 disc sanding attachment.

The latest machine features:

Huge 1.8 KW (2.5 HP) Italian Lafert motor with 20% more grunt and bypass vacuum with a clear lid.

We offer full servicing, repairs, respraying or restorations to bring your machine back to as new condition.

Call for pricing and deals for one or more machines.

Timbermate Products was founded in Australia in 1991. Timbermate began as a small manufacturing company producing a unique waterbased woodfiller, which is solvent and acrylic free. Most products at that time were either latex or solvent based. Today our unique waterbased products are accepted worldwide. Timbermate has developed a reputation for its quality products both in the manufacturing and distribution chain. All products in the Timbermate family are of the highest quality. Timbermate's vision is to produce and distribute the highest quality products. Our policy within Timbermate is that we will not manufacture or distribute any products that are price driven in favour of quality products.

Timbermate Woodfiller is an Interior grade 4 in 1 Woodputty, Grainfiller, Edgefiller and Crackfiller. When thinned slightly with water can also be used as a sanding sealer. Timbermate does not shrink, sink, crack or fall out and has an indefinite shelf life. It is non-flammable, non-toxic and can be used to the last gram. The secret ingredient of Timbermate is tap water therefore containing no Acrylic, Latex or Solvents.

Timbermate comes in 13 premixed colours plus Natural Tint Base. Timbermate takes all types of known stains, varnishes and coatings. The Timbermate formula is over 85 years old and is the only genuine water-based formula in the world proving that the formulation has stood the test of time.

Timbermate comes in 13 premixed colours plus Natural Tint Base. Timbermate takes all types of known stains, varnishes and coatings. The Timbermate formula is over 85 years old and is the only genuine water-based formula in the world proving that the formulation has stood the test of time.

The Galaxy is a prime example of the innovative creativity and engineering that Galaxy consistently delivers. Having the flexibility of using either drum or belt sanding option, allows you the ability to aggressively tackle difficult projects with a drum sander while using a belt sander for fine sanding.

Whether you need to increase production or ensure the finest finish, the Galaxy sanding machines are the perfect tool to ensure the best possible results.

Our staff are always happy to help, so feel free to contact us or drop in on our showroom in Chatswood, Sydney to view all our range floating or engineered timber floors.

Synteko and the Environment ...

Synteko strives to make sure that all possible care is taken to not effect the environment when using our products.

BJ's TIMBER FLOORING

When you invest in timber flooring, you expect a lifetime of stunning good looks and rugged durability. **BJ's Timber Flooring** has been supplying quality timber floors in Perth for almost 50 years. We use premium indigenous species such as Brushbox, Spotted Gum, Jarrah and Blackbutt to provide solid flooring that is a subtle statement of natural sophistication. We select only the highest quality imported timbers such as French Oak, American Oak and Bamboo for flooring Perth homes.

Professional and Personalised Service BJ's Timber Flooring is an independently owned and operated family business and we pride ourselves in being able to provide a high level of quality service to our customers. Established in 1964, the main focus of our operations has been with the trade and prominent builders across Australia. Over the years we've developed strong relationships with suppliers and formed alliances with the country's top mills so that we can offer industry leading expertise and great value for our customers. Being a member of the Australian Timber Flooring Association we have constantly been at the forefront of the latest advances within the industry.

BJ's Timber Flooring are distributors of:

- Solid Tongue & Groove 10, 12, 14, 19mm and 21mm thick timber flooring ranging in widths from 63mm – 210mm
- Big River Engineered 14mm floorboards
- Acoustic Systems – laboratory and field tested for multi storey residential or commercial applications
- Finishes include Bona, Feast Watson, Polycure and Toby Polyurethane
- Moisture barriers include Sika, Selleys, Bostik and Epecrete
- Adhesives include Bostik, Sika, Selleys and construction chemicals
- Sanding machines include American Sanders, Frank, Clarke and Bona
- Cleaning and maintenance products

- Stair nosing, skirting boards, splay bead and reducer strips.
- Sandpaper, nails, power fasteners and fillers complete the range.

Timber Flooring Industry Product Buying Guide

Boral Timber is one of the largest manufacturers of Australian hardwood products. Boral Timber has implemented AFS Chain of Custody certification to support responsible and sustainable forest management in Australia. With Australian Forestry Standard (AFS) certified products, the timber used for Boral Timber's hardwood flooring and decking is sourced from legal and sustainably managed resources.

Boral Timber has become one of the largest suppliers of hardwood and softwood timber in Australia with a diverse product range.

Decorative hardwood products

- Boral 19mm and overlay solid strip flooring
- Boral Silkwood engineered hardwood flooring
- Boral parquetry
- Boral decking
- Furniture boards

Structural

- Softwood
- Green and seasoned hardwoods

Boral Timber has access to some of the most sought after native Australian hardwood timber species on the market to suit any interior.

The modern trend towards creating a seamless transition from inside to outside, makes Boral Timber Blackbutt and Spotted Gum the ideal species to use.

Available in internal flooring and outdoor decking, it is perfect for anyone interested in expanding their living area to create an outdoor room.

Blackbutt and Spotted Gum also have a natural fire resistance. Their fire retarding properties make them suitable for use in many bushfire prone areas under Australian Standard AS3959.

For further information on Boral Timber products and for a list of stores and display centres please contact Boral Timber on 1800 818 317 or visit www.boral.com.au/timber

List your timber flooring project with ATFA

Are you about to get a timber floor installed and/or sanded and polished? Now you can get a quote directly from an ATFA member simply by posting it on the ATFA website. You set the timelines and conditions and ATFA sets a quality standard for quoting members to apply.

So if you're a home owner, insurance company, builder, project company, architect or retailer, this is designed to make life easier for you! Just complete the project template and then expect to hear from ATFA timber flooring technicians wanting to provide a quote for you.

How it works

- You can list the details of your project at www.atfa.com.au/atfa-list-a-project and ATFA members will in turn contact you to organise a visit to your project site and to complete a quotation for you.
- You can specify how they contact you, the quotation timelines and which members you accept to undertake a quote (we recommend at least 3 quotations).
- ATFA will check that you are receiving offers of quotation midway through the open quotation period.
- ATFA will notify ATFA members as soon as your project is posted.
- This is a free service from ATFA, designed to benefit both consumers and ATFA members.

We're always here when you need us.
