

# Bevel Lap Cladding

Cladding

## Dramatically different

Smooth walls and dark shadows. Bevel Lap Cladding, in Western Red Cedar, comes from Cedar Sales' very own design house. Bevel Lap is developed especially for bold architectural applications, and combines flat panels with deep horizontal shadows. Its three different widths are interchangeable and can be mixed to create interesting and unique wall effects.

## Bevel Lap Cladding features and benefits

- Flat faces are even and smooth for a minimalistic effect
- Angled channels create deeper shadows and give superior water shedding
- Machined drip grooves to suit vertical installation
- Can be stained in natural tones and contrasted with dark doors and windows
- Available in three interchangeable widths

## Bevel Lap Cladding is ideal for

- Modern, architecturally-designed buildings
- Alternative to standard wall claddings
