# A WORD FROM OUR HAPPY CLIENTS

The team at Keystone Linings are great to work along side with. Keystone are exceptional at any assistance we require from inquiries, quotes, advice and procurement of materials they are always on time on budget while delivering a high quality standard of work. Thank you, we look forward to working together in future projects again!

**Luka**

A big thank you to Shuria Agrawaal and the Keystone Linings team for working with Amicus Construction, with the design and manufacturing of their Key-Lena perforated panels. Very professional and helpful. Will definitely work with Keystone Linings for future projects. The finished panels speak for themselves. Thank you again for your help Shuria.

**EJE Architecture**  
Knights Newcastle

James Hardie is very proud to have an ongoing strong relationship with Keystone Linings for several decades. We've partnered on more than 200+ projects covering prominent Sydney CBD skyline projects, food and beverage outlets, Public Schools, Airport Lounges and a multitude of commercial office spaces Australia wide. Keystone is a solution based company and has vast knowledge & experience when it comes to JH products. Shuria, Catherine and Michael have been instrumental in actively offering out of the box solutions with top-notch communication and project management expertise along the way. With thousands of square meters supplied, and installed, we would highly recommend Keystone to all Builders, Architects and Installers.

**James Hardie**

We wanted to express our thanks to you for your assistance on the Ansarada project which recently won the Australian Interior Design Award for Best Workplace Design AustraliaWide for 2014. The project was a particularly challenging one in terms of acoustics and you were able to realise our vision for the attenuation devices which formed the backbone of the project. The highly detailed nature of the install coupled with the intricate patterning of the acoustic devises demanded the kind of precision that would not normally be associated with a fit-out of a century old wool store however working together we managed to achieve a remarkable result. We thank you for lending your expertise to the project and look forward to working together in the future.

**Ben Mitchell**
